¹: 'MUSE' is 'Mainstream US English', reflecting a standardized variety of English in the US

²: /ɑ/ and /ɔ/ as monophthongs are merged for many, but some distinguish cot (/kɑt/) and caught (/kɔt/)

³: These can be written /eɪ ou aɪ aʊ ɔɪ/ as well.

⁴: /ʌ/ and /ə/ differ in stress, not sound. Details here.

⁵: /ə/ can also be written /ɛ/ (stressed) or /ə/ (unstressed)

Common MUSE IPA Pitfalls

- Don't capitalize words in IPA
- Double consonants are lies (e.g. 'happy' /'hæpi/)
- The letter <c> is always one of /k s ſ tʃ/
- /r/ is the Spanish trilled <r>, /ɹ/ is the English <r>
- /y/ is a rounded front vowel in the IPA, the English <y> sound in 'yes' is /j/
- <th> is either /θ/ or /ð/ ('this thistle' /ðɪs 'θɪsl/)
- /x/ is a voiceless velar fricative, the English <x> is usually /ks/ as in 'axis' /'æksɪs/
- Silent letters (lamb, name, knee) are lies
- Online IPA 'translator' tools and ChatGPT are a) often wrong and b) likely not your dialect
- If you're using a symbol not on this page for Mainstream US English, you're probably wrong
- **Remember, your writing system is lying to you!**

Phonological Rule Formatting

/x/ → [y] / __z

"Phoneme x is realized as allophone y in the environment (before z)"

Commonly Used Symbols

- __ stands in for the sound which is changing
 - __i means 'before an /i/ vowel'
 - t__ means 'after a /t/'
 - b__[stop] means 'between /b/ and any stop'
- # means 'a word boundary'
 - __# means 'at the end of a word'
 - #__ means 'at the beginning of a word'
- V means 'any vowel'
- C means 'any consonant'
- N means 'any nasal'
- Ø means 'nothing' or 'zero'
 - 'Ø → [x]' inserts, '/x/ → Ø' deletes
- Phonemes go in / / slashes
- Allophones (and features) go in [] brackets
